It certainly seems appropriate to further examine the concept of knowledge (in the context of the current management interest in the topic of knowledge management) from a more philosophical perspective than has hitherto been the case. Furthermore, I would suggest that the topic of knowledge creation (Nonaka and Takeuchi, 1995) seems worth exploring from a philosophical perspective also.

**Theses 11**

Knowledge Management comes true only as a moment of a new practice, otherwise it remains a data- or information-management: away from the shadows.

**Buzzwords**

- Relationships between Information & Knowledge
- Practice
- Information management
- Behavior
- Lifecycle of Knowledge Management
- Measurement of Knowledge-/Information management
- Knowledge assessment
