

Arbeitstagung Programmiersprachen

Walter Dosch, Michael Hanus

Vorwort der Workshop-Leitung	362
<i>Dirk Kleeblatt</i>	
Deriving a Strong Normalizing STG Machine	363; 2845–59
<i>Ronald Veldema, Michael Philippsen</i>	
Tapir: Language Support to Reduce the State Space in Model-Checking	364; 2860–74
<i>Sebastian Fischer</i>	
Reinventing Haskell Backtracking	365; 2875–88
<i>Fabian Reck, Sebastian Fischer</i>	
Towards a Parallel Search for Solutions of Non-deterministic Computations	366; 2889–00
<i>Petra Hofstedt, Florian Lorenzen</i>	
Constraint Functional Multicore Programming	367; 2901–15
<i>Daniel Seidel, Janis Voigtländer</i>	
Taming Selective Strictness	368; 2916–30
<i>David Sabel, Manfred Schmidt-Schauß, Frederik Harwath</i>	
Reasoning about Contextual Equivalence: From Untyped to Polymorphically Typed Calculi	369; 2931–45
<i>Markus Degen, Peter Thiemann, Stefan Wehr</i>	
True Lies: Lazy Contracts for Lazy Languages	370; 2946–59
