19th Workshop on Automotive Software Engineering (ASE'22)

Heiko Dörr[1], Steffen Helke[2]

The 19th Workshop on Automotive Software Engineering (ASE'22) addresses the challenges of software development in the automotive sector as well as suitable methods, techniques, and tools for this specific area. With the increasing amount of connected vehicles, modern driver assistance systems, and the challenges of fully automated driving, automotive software plays an important role today more than ever.

Furthermore, the distraction-free and intuitive operation of vehicle applications via multimodal interfaces play an increasingly important role. In addition, innovative technologies like voice control, cloud computing, or 5G connectivity found their way into the car. These technological advances have changed the experience of driving a car: In the near future services such as WhatsApp, Skype or even Facebook will be integrated into the car and can then be operated by users while driving.

The main objectives of the workshop are the exchange and discussion of how current challenges in automotive software engineering can be mastered. The thematic orientation offers many cross-references to the Software Engineering (SE) conference to which the workshop is colocated. The workshop addresses researchers, developers, and users from the automotive industry as well as scientists from research institutes and universities working in the field of automotive software engineering. Traditionally, the focus is less on theory than on applied research.

To ensure that only high-quality submissions are selected for publication and presentation, three reviewers were selected for each of the contributions submitted to this year's workshop. Many thanks to all the reviewers who contributed with great commitment to the review process.

As in previous years, the workshop will be complemented by invited talks from the automotive community. We would like to thank Prof. Dr. Frank Köster (DLR, University of Oldenburg), Alexandru Kampmann (RWTH Aachen) and Prof. Dr. Ina Schaefer (TU Braunschweig) for their commitments.

Program Committee

Dr. Christian Allmann	Audi AG
Prof. Dr. Marcel Baunach	Technische Universität Graz
Dr. Mirko Conrad	samoconsult GmbH
Prof. Dr. Sabine Glesner	Technische Universität Berlin
Dr. Kerstin Hartig	Expleo Germany GmbH
Prof. Dr. Paula Herber	Universität Münster
Prof. Dr. Thomas Kropf	Robert Bosch GmbH
Prof. Dr. Stefan Kugele	Technische Hochschule Ingolstadt
Apl. Prof. Dr. Müller	Universität Paderborn
Dr. Thomas Noack	Datendeuter GmbH
Prof. Dr. Ralf Reißing	Hochschule Coburg
Prof. Dr. Eric Sax	Karlsruhe Institute of Technology (KIT)
Prof. Dr. Ina Schaefer	Technische Universität Braunschweig
Prof. Dr. Holger Schlingloff	Humboldt Universität und Fraunhofer FOKUS, Berlin
Prof. Dr. Jörn Schneider	Hochschule Trier
Prof. Dr. Ramin Tavakoli	Technische Hochschule Nürnberg
Prof. Dr. Thomas Thüm	Universität Ulm
Dr. Thomas Vogel	Humboldt Universität zu Berlin
Prof. Dr. Andreas Vogelsang	Universität zu Köln
Dr. Rebekka Wohlrab	Carnegie Mellon University

Organization

Dr. Heiko Dörr	Method Park by UL
Prof. Dr. Steffen Helke	Fachhochschule Südwestfalen

For many years, this workshop has been organized by the GI interest group (Fachgruppe) on "Automotive Software Engineering"[3]. The steering committee was consequently involved in the organization of this workshop as well.
