

Gesellschaft für Informatik e.V. (GI)

publishes this series in order to make available to a broad public recent findings in informatics (i.e. computer science and information systems), to document conferences that are organized in co-operation with GI and to publish the annual GI Award dissertation.

Broken down into the fields of

- Seminar,
- Proceedings
- Dissertations
- Thematics

current topics are dealt with from the fields of research and development, teaching and further training in theory and practice. The Editorial Committee uses an intensive review process in order to ensure the high level of the contributions.

The volumes are published in German or English

This book gives an overview of outstanding dissertations in computer science of the year 2007. Every year, the Gesellschaft für Informatik (GI), together with the Swiss Informatics Society (SI), the Austrian Computer Society (OCG) and the German Chapter of the ACM (GChACM), awards an excellent dissertation that represents an important improvement in Informatics. The award-winner is chosen in a careful selection procedure from dissertations proposed by Austrian, Swiss and German universities, where each university can make at most one suggestion per year. The series "Ausgezeichnete Informatikdissertationen" presents these outstanding dissertations to the informatics community, as well as to the public in order to support knowledge transfer from universities to industry and society (in German).
